ABOUT US

Etactics, Inc. is a national leader of providing solutions for invoice or statement services. Our automated statement solution allows assisted living, long term care, and infusion pharmacies to upload statement data exported from their Pharmacy Management software into our encrypted customer area. Statement data is re-engineered, printed, and delivered to its private pay clients and facilities in an automated and timely manner at a 35% to 40% monthly cost savings.

Multiple Automatic Delivery Methods

We automate the delivery of any invoice or statement using methods referred by your clients or patients – USPS, electronic, facsimile, or via a mobile device. We have a reputation for providing complete solutions that guarantee secure communications.

Re-engineering Statement Data

Regardless of the PM system that your organization employs, we can easily extract text data that allows us to re-engineer the invoice or statement to provide your clients and patients with a well formatted document. Etactics offers statement solutions that allow you to customize all statement data.

Automated Campaigns

Our IntelliStatement® solution automates campaigns that influence clients and patients to make payment in a timely manner or within an acceptable timeframe. For example, employing an automated campaign that delivers a statement with an accompanying past due letter, followed by an automated courtesy or live phone call, and finally a final disposition method can reduce bad debt write-offs and allow your organization to “collect more and collect faster”.

Electronic Delivery Methods

Etactics employs a premier Electronic Invoice Presentation and Payment (EIPP) portal, or CustomerAccess Plus™. Clients or patients can register to receive an invoice or statement electronically and then select to make a payment online as well. They may also select to make one-time payments or monthly recurring payments, through a variety of secure methods.
